  createdAt: new Date(), // Date
  skills: ["JavaScript", "MongoDB", "React"], // Array
  address: {
    city: "Bhagalpur",
    state: "Bihar",
    pin: 812001
  }, // Object / Embedded Document
  middleName: null, // Null
  usernamePattern: /manas/i, // Regular Expression
  profileImage: BinData(0, "SGVsbG8="), // Binary Data
  lastLogin: Timestamp(), // Timestamp
  accountBalance: NumberDecimal("15499.75"), // Decimal128
  youtubeSubscribers: NumberLong(250000), // Long (64-bit integer)
  minValue: MinKey(), // MinKey
  maxValue: MaxKey() // MaxKey
})
```

**Is MongoDB really
Schemaless?**

**Ans: Yes, but we can
create schema
validations.**
